

# Chapter 1- Vocabulary List

## Anatomy

### Anatomy/Physiology

Anatomy

Physiology

### Levels of Organization

Atoms

Organelles

Organs

Molecule

Cells

Organ system

Macromolecule

Tissues

Organism

### Characteristics that All Living Things Possess

Organization

Growth

Metabolism

Development

Responsiveness

Reproduction

### Anatomical Terminology

#### Body Positions

Anatomical Position

Supine

Prone

#### Directional Terms

Superior

Proximal

Superficial

Inferior

Distal

Deep

Anterior

Medial

Posterior

Lateral

#### Body Sections

Axial Skeleton

Appendicular Skeleton

#### Body Parts

Cephalic

Brachial

Coxal

Cervical

Antebrachial

Femoral

Thoracic

Carpal

Crural

Abdominal

Digital

Tarsal

Pelvic

Digital

#### Regions

Hypochondriac

Epigastric

Lumbar

Umbilical

Iliac

Hypogastric

#### Body Planes

Sagittal plane

Transverse plane

Frontal plane

#### Body Cavities

Posterior (Dorsal) Cavity

Abdominopelvic Cavity

Pelvic Cavity

Anterior (Ventral) Cavity

Mediastinum

Cranial Cavity

Pleural Cavity

Vertebral Canal

Pericardial Cavity

Thoracic Cavity

Abdominal Cavity
