

**Chapter 6- Vocabulary List
Honors Anatomy**

General Features (Compact Bone, Cancellous Bone, Ossification, Repair) pgs. 115-123

Long bones	Medullary cavity	Ossification
Short bones	Periosteum	Chondrocytes
Flat bones	Endosteum	Osteoclasts
Irregular bones	Osteoblasts	Bone remodeling
Diaphysis	Osteocytes	Hematoma
Epiphysis	Compact bone	Cartilaginous callus
Articular cartilage	Cancellous (Spongy) Bone	Bony callus
Epiphyseal plate	Osteon	

Articulations (Joints and Movements)

Articulation	Ligament	Plantar flexion
Joint	Plane (Gliding) joint	Dorsiflexion
Fibrous joint	Saddle joint	Abduction
Suture	Hinge joint	Adduction
Cartilaginous joint	Pivot joint	Pronation
Synovial joint	Ball-and-socket joint	Supination
Articular cartilage	Condylloid joint	Eversion
Joint capsule	Flexion	Inversion
Synovial membrane	Extension	Medial rotation
Synovial fluid	Hyperextension	Lateral rotation

Bone Anatomy, Axial Skeleton, Appendicular Skeleton (There will be NO vocabulary quiz for these sections)

Foramen	Fossa	Condyle
Meatus	Tuberosity	
Tubercle	Process
