Re: Science Donation Request

Dear Parents,

The West Ranch High School Science Department is committed to providing an effective and comprehensive hands on laboratory based curriculum for all students. Due to funding constraints we would like to request a voluntary laboratory contribution to purchase materials required for laboratory activities. Our department purchased over \$30,000 of laboratory equipment for this year’s science classes and it is our goal to raise \$1000 per class this year to support the department. This will allow our department to continue to offer high quality, hands on laboratory experiences.

If you are able to make a voluntary contribution, it can be made online through our ASB Web Store at <https://westranch.myschoolcentral.com> under “*science donations*” OR pay by credit/debit card or cash in person at the ASB office. Thank you for your continued support of our programs.

We are also very interested in partnering with community leaders and businesses. If you have any opportunities or resources to provide additional support please contact your son or daughters teacher.

Thank you for your support!
